This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

PREFACE

THIS book presents in print the records contained in the volume of probate records called "Will &c. No. 2, From Sept 12 1716 to Jan 7 1728/9," and continues the work authorized by the City Council of the city of Providence on March 6, 1891, when the following Joint Resolution was adopted:

"RESOLVED, That Horatio Rogers, George M. Carpenter, and Edward Field, are hereby appointed record commissioners, who shall serve without compensation, for the purpose of collecting and printing the early records of the town of Providence. And said commissioners are hereby authorized to expend the sum of one thousand dollars for collecting and printing said records, said sum to be charged to the appropriation for printing."

Since the passage of this resolution appropriations have been made from time to time for the continuation of the work.

The methods employed in reproducing this volume in type have been the same as those heretofore used, and for convenience they are repeated here. The figures at the top of the

Digitized by Google

pages and enclosed in brackets indicate the paging of the present volume; the heavy figures enclosed in brackets represent the paging of the original book as it now stands; words or letters printed in parentheses are so found in the original; brackets enclosing blank space, thus [ ], signify something is missing or illegible in the original.

An index to subjects, proper names, a miscellaneous index, and an index to Indian names are added.

It will be observed that a note at the beginning of the index to subjects, explains certain references in such index.

During the period while this book has been going through the press, the work of reindexing the probate records of Providence, and the printing of such index has also been in progress. In preparing this Probate index each estate was designated by a specific number, and it has been thought that a reference to such number in this book would be a convenience to those who have occasion to examine its contents, and such number will be found in the index to subjects.

HORATIO ROGERS,
EDWARD FIELD,
Record Commissioners.
